**REPAIR ACCESS ROAD, NEWPORT ANNEX 2**

*PREPARED BY AFRL/RIOC*

AIR FORCE RESEARCH LABORATORY  
ROME RESEARCH SITE  
ROME, NEW YORK

**PROJECT NR: ULDF 09-0007**

**DATED: 30 MARCH 2009**

## **PROJECT REQUIREMENTS**

### **1.01 SCOPE**

- A. Repair road pavement and shoulders connecting site X and B1624 parking lot located at Newport, Annex 2. Option 1 will consist of the replacement of the sewer line from B1624.

### **1.02 ITEMS OF WORK**

#### **A. Basic Bid Work:**

1. Repair existing asphalt and base course as required.
2. Repair and re-grade shoulders.
3. Provide asphalt stabilized shoulders
  - a. Slope to drain
4. Overlay roadway with new two-inch layer of asphalt.
  - a. Slope to drain. Slope will be minimal so as to avoid exposing transported airframes to a tip over hazard.
  - b. Note existing roadway has fabric stabilization below grade.
5. Maintain access for vehicular traffic during demolition and construction phases.
6. The attached drawing outlines the general location and detail of work required.

#### **B. Option 1 Work:**

1. Work under this option will be identified separately on the contractor submitted proposal.
2. Saw-cut pavement and remove.
3. Remove sewer line between clean-out and man-hole in area shown on the attached drawing.
4. Provide and install a new insulated four (4) inch PVC sewer-line in select fill bedding.
5. Provide and install new base course and asphalt paving.

### **1.03 MATERIAL SUBMITTALS**

- A. The contractor shall submit the items indicated on the attached AF Form 66.
